Insect Repellent Recomendations The Centers for Disease Control and Prevention (CDC) recommends products containing active ingredients which have been registered with the Environmental Protection Agency (EPA) for use as insect repellents on skin or clothing. All of the EPA-registered active ingredients have demonstrated repellency, however, some provide longer lasting protection than others. Additional research reviewed by CDC suggests that repellents containing DEET or picaridin typically provide longer-lasting protection than the other products. Oil of lemon eucalyptus provides longer lasting protection than other plant-based repellents. ALWAYS FOLLOW LABEL INSTRUCTIONS.					1	Concerned about using insect repellent? Contact the National Pesticide Information Center (1-800-858-7378) for more information.
3	4	5	6	7	8	DEET has been keeping mosquitoes away from people for over 40 years.
10	11	12	13	14	15	Repellents don't kill mosquitoes.
17	18	19	20	21	22	Always read and follow label instructions when using repellents.
